

Supervised Injection and Bill C-2

INTERNATIONAL HARM REDUCTION DAY

MAY 7TH 2015

To celebrate International Harm Reduction Day we are releasing data from the PROUD (Participatory Research in Ottawa: Understanding Drugs) study and hosting a discussion with community members, people who use drugs, service providers, and researchers. Refreshments will be provided.

Bill C-2, the 'Respect for Communities Act', aims to amend the Controlled Drugs and Substances Act. However, the bill creates more barriers to the creation of new supervised injection services. Therefore, the bill undermines the rights of people who consume drugs to access lifesaving and health promoting services, while preventing the improvement of public safety in drug affected neighbourhoods.
